

MobiusEMS: Official Enterprise Product Brochure

A Complete Guide to What MobiusEMS Actually Does for Your Business

Mobius Bloom Venture Pvt Ltd | Deployment: <https://employee.whalexy.com>

Product Release: v2.0-PROD | Classification: Enterprise Product Collateral

1. EXECUTIVE OVERVIEW & CORE PURPOSE

The Operational Challenge: Escaping the "5-Tool Trap"

Most growing companies struggle with fragmented software tools that do not talk to each other:

- * **Hardware Time Clocks:** Break down often, create morning entrance queues, and are useless for remote or field staff.
- * **Isolated Task Boards:** Great for logging tickets, but completely disconnected from employee attendance, capacity, and reviews.
- * **Spreadsheet-Driven Appraisals:** Annual reviews conducted months after work was done, suffering from recency bias and personal favoritism.
- * **Standalone Sales CRMs:** Expensive sales tools disconnected from employee workload, leave calendars, and verified accounting ledgers.
- * **Scattered Records:** Resumes in inboxes, training records in spreadsheets, and zero centralized compliance audit trails.

The MobiusEMS Solution

MobiusEMS unifies daily work execution, verified geofenced attendance, talent capabilities, objective performance evidence, and commercial sales territories into one coherent, role-aware operating workspace.

Our Three Guiding Principles

1. **Deterministic Mathematics Over Guesses:** All performance scores, KPI percentages, attendance rules, and sales metrics use transparent mathematical calculations. AI is strictly an advisory layer and is barred from making employment, salary, promotion, or termination decisions.
2. **Respectful Accountability Over Spyware:** No background keyloggers, no secret screen grabbers, and no 24/7 mobile GPS stalking. Accountability is measured where it matters: verified physical presence at shift boundaries and verifiable completion of peer-reviewed work.
3. **Local Zero-Retention Voice Privacy:** Speech-to-task recognition runs locally on your host server. Spoken commands are transcribed and the ephemeral audio is shredded immediately. Voice recordings are never sent to third-party cloud speech APIs and never stored on disk.

2. PEOPLE & WORKFORCE MANAGEMENT

Employee 360 Profiles & Longitudinal Career Timeline

- **Complete Digital Personnel Record:** Centralizes employment details, statutory IDs (PAN, Aadhaar, Tax IDs), bank details, emergency contacts, active projects, and verified skills.
- **Longitudinal Career Timeline:** An immutable chronological timeline recording every promotion, designation change, salary revision, department transfer, and milestone award throughout the employee's tenure.
- **Profile Completion Health Indicator:** Automatically tracks profile completeness against mandatory fields, prompting employees during weekly check-ins to keep records current.

Dynamic Organization Structure & Interactive Org Hierarchy

- **Flexible Organization Graph:** Configure multi-tier Departments, Teams, and Designations with defined reporting lines and approval paths.
- **Interactive Visual Org Chart:** Explore company reporting structures from executive leadership down to individual contributors, inspect sub-team distribution, and spot vacant positions.

Resumable Onboarding & First-Login Security

- **Frictionless Invitation:** HR provisions employee accounts and sends secure invitation links with temporary credentials.
- **Mandatory First-Login Password Change:** Enforces immediate password updates before new hires can access any company data.
- **Resumable Profile Setup Wizard:** Walks new hires through uploading identity documents, emergency contacts, and personal bio without losing progress.

3. SMART GEOFENCED ATTENDANCE & LEAVE MANAGEMENT

Zero-Hardware Browser-Based Check-In

- **No Biometric Hardware Required:** Employees check in directly on their mobile or laptop browser.
- **300-Meter Office Geofence:** Validates that check-in occurs within 300 meters of the registered office location using spherical distance calculations.
- **GPS Anti-Spoofing Protection:** Automatically rejects location readings with accuracy fuzzier than 200 meters to prevent fake location apps and mock GPS emulators.

Automated Shift Determinations

- **11:30 AM Late Cutoff:** Check-ins completed after 11:30 AM IST are automatically marked as Late.
- **4-Hour Minimum Shift Rule:** Upon checkout, any shift totaling under 240 minutes (4 hours) of elapsed time is automatically demoted to a Half-Day.
- **Clear Daily Statuses:** Categorizes every workday into Present, Late, Half-Day, On Leave, or Absent.

Attendance Regularization & Manager Sign-Off

- **Field Travel & Issue Resolution:** When client visits or transit delays prevent standard check-in, employees submit a regularization claim with supporting notes.
- **Direct Manager Approval:** The request routes to the reporting manager; approval updates daily attendance and records a permanent audit entry.

Leave Quota Tracking

- **Custom Leave Balances:** Manage annual quotas for Casual Leave, Sick Leave, Paid Leave, Unpaid Leave, and Work From Home.
- **Date Overlap Guard:** Blocks overlapping or duplicate leave submissions automatically.
- **Live Department Calendar:** Approved leaves immediately reflect on team availability calendars.

Real-Time Attendance Register

- **Executive & HR Visibility:** Real-time morning register showing attendance status across all departments, late arrivals, approved leaves, and unexpected absences.

4. PROJECT DELIVERY, KANBAN & WORK EXECUTION

Interactive 7-Stage Visual Kanban

- **Structured State Transitions:** Tasks move through strictly validated stages:
Not Started → In Progress → In Review → Completed
(with supported exception paths for Blocked, Reopened, or Cancelled).
- **Prevents Workflow Skips:** Direct jumps from Not Started to Completed are blocked, ensuring review integrity.

Real-Time Blocker Escalation

- **Flag Impediments Instantly:** Team members can flag tasks as Blocked and specify the exact roadblock:
- External Dependency (e.g., waiting for client credentials or third-party APIs)
- Missing Design Assets (e.g., UI/UX mocks missing)

- Infrastructure Outage (e.g., staging server down)
- Requirement Ambiguity (e.g., unclear business logic)
- **Manager Alerts:** Blocked tickets immediately alert managers and department heads to resolve bottlenecks.
- **Fairness Protection:** External dependencies are flagged so employees are not penalized for delays outside their control.

Cycle Time & Quality Rework Tracking

- **Velocity Metrics:** Measures elapsed hours from task start to completion.
- **Rework Counter:** Automatically increments whenever a task fails review and bounces back to In Progress or Reopened, pinpointing requirement ambiguities without finger-pointing.

Centralized Task Tracker Grid

- **Multi-Project Grid:** Filter and sort all company tasks by assignee, priority (Low, Medium, High, Critical), project, status, and deadline.
- **Workload Visibility:** Quickly identify approaching deadlines and unbalanced task distribution.

Append-Only Task Activity Stream

- **Audit Accountability:** Every priority update, status shift, reassignment, and discussion comment is permanently logged with actor name and timestamp.

5. LOCAL ZERO-RETENTION VOICE-TO-TASK AI

11 Regional Indian Languages + English

- **Multilingual Voice Capture:** Field staff, sales reps, and engineers can speak in English, Hindi, Bengali, Tamil, Telugu, Marathi, Gujarati, Kannada, Malayalam, Punjabi, or Urdu.

Guaranteed Audio Shredding (Zero Cloud Exposure)

- **100% Private Local Transcription:** Audio is transcribed on your local host server. The ephemeral audio file is processed in memory and shredded immediately. Recordings are never sent to external cloud APIs and never stored on disk.

Intelligent Intent & Duration Parsing

- **Prospective vs. Retrospective:**
 - Future tasks ("need to complete report by tomorrow") → Automatically creates a task in To-Do.
 - Completed work ("finished client presentation in 3 hours") → Moves task to In Review with 3 actual hours logged.
- **Spoken Number Conversion:** Converts spoken phrases ("two hours", "दो घंटे") into numeric durations.
- **Hinglish Compound Splitting:** Splits multi-part instructions ("Ayush ko frontend do aur Priya ko backend do") into distinct task assignments.

Human-in-the-Loop Confirmation

- **Editable Preview:** Extracted task details (title, owner, hours, priority) are displayed on an editable preview card before saving to the database.

6. TALENT ACQUISITION & AUTOMATED RESUME SCREENER

Reusable Job Description (JD) Library

- **Standardized Hiring Criteria:** Maintain approved job requisition templates with documented skill profiles, experience levels, and responsibilities.

Visual Applicant Hiring Pipeline

- **Structured Stages:** Track applicants across:
Sourced → Screened → Interviewing → Offer Extended → Hired / Rejected.

Automated Resume Screening Engine

- **Instant CV Analysis:** Upload candidate resumes in PDF or DOCX format.
- **Skill & Experience Extraction:** Parses claimed skills, education, and years of experience.
- **Advisory Fit Score:** Compares resume data against the target JD requirements and computes a documented qualification match score.
- **Human-Led Decision Making:** AI never rejects candidates automatically; interviewers make all final hiring decisions.

1-Click Hired-to-Employee Onboarding

- **Zero Data Re-Entry:** When an applicant is marked Hired, clicking "Convert to Employee" provisions their Employee 360 profile, copies their resume details, and initiates their onboarding invitation.

7. CAPABILITY MATRIX, SKILL HEATMAPS & TIMED ASSESSMENTS

Centralized Skills Inventory

- **Standard Competency Catalog:** Central inventory covering Technical, Operational, and Domain skills rated from 1 to 5 stars.

Two-Tier Skill Verification

- **Self-Reported Ratings:** Employees rate their own proficiency and attach evidence links (GitHub repos, portfolio links, project deliverables, certifications).
- **Manager Verification:** Leads verify proof before ratings count toward promotion readiness or departmental competency scores.

Departmental Competency Heatmaps

- **Knowledge Silo Identification:** Visual heatmaps showing skill depth across teams.
- **Single-Point-of-Failure (SPOF) Alerts:** Flags critical skills possessed by only one person in the organization to encourage proactive cross-training.

Automated Timed Assessments

- **Standardized Evaluations:** Create tests with randomized question pools and strict countdown timers.
- **Instant Grading:** Automated pass/fail scoring for rapid candidate screening and internal skill benchmarking.

8. OBJECTIVE PERFORMANCE MANAGEMENT

Cascading Strategic Goals & Measurable KPIs

- **Strategic Alignment:** Connect company-wide goals down to departments and individuals with clear deadlines and weightings.
- **Quantifiable KPIs:** Measurable target vs. actual metrics with bounded achievement between 0% and 200%.

Structured 360-Degree Performance Reviews

- **Multi-Competency Rubrics:** Standardized evaluation templates covering technical execution, teamwork, communication, and leadership.
- **Balanced Feedback:** Evaluates inputs from managers, peers, and employee self-reviews.

Deterministic Mathematical Scoring Formula

- **Transparent Calculations:** Composite review scores are calculated mathematically:
Final Score = (Goals Achievement × Weight) + (KPI Performance × Weight) + (360 Reviews × Weight)
- **Objective Performance Bands:**
 - 90%+ : **Exceptional**
 - 75% – 89.9% : **Strong Performer**
 - 60% – 74.9% : **Consistent Performer**

- Below 60% : **Developing / Needs Support**

Immutable Frozen Review Snapshots

- **Audit-Proof Records:** Once a review cycle closes, all scores, comments, and weights are frozen into an immutable snapshot record that cannot be altered retroactively.

9. GROWTH & ALLOCATION INTELLIGENCE

Workload & Burnout Radar

- **Workload Telemetry:** Live table tracking each employee's open tasks, estimated remaining hours, urgent tasks, overdue items, and workload classification (Overloaded, High Workload, Balanced).
- **Protects Focus Time:** Helps managers redistribute work before team burnout occurs.

Training Catalog & Skill Assignments

- **Course Repository:** Catalog of internal and external courses and workshops.
- **Direct Assignment:** Managers assign specific training to close identified skill gaps.

Skill Growth Tracking

- **Longitudinal Progression:** Measures verified competency growth over time (e.g., initial rating 5.0 → current rating 7.5, +2.5 growth).

Smart Project Staffing Recommendations

- **Objective Staffing Suggestions:** When planning a project, the system recommends team members combining verified skill fit (70%), current availability (15%), and historical performance (15%).

10. CONTINUOUS CONTRIBUTION INTELLIGENCE

Friday Weekly Check-In Ritual

- **3-Minute Progress Log:** Employees record completed deliverables, next week's priorities, and active blockers every Friday.

Deliverable Velocity Over Desk Face-Time

- **Measured Output:** Tracks tangible deliverable completion rates over rolling 30-day and 90-day windows.

Algorithmic Peer Contribution Percentiles

- **Fair Peer Benchmarking:** Normalizes output volume, commitment reliability, and rework frequency across peer cohorts.

The Evidence-Coverage Guardrail

- **Protects Employees:** When an employee forgets to submit an update, the system flags an "Information Gap" rather than artificially depressing their performance score.

11. COMMERCIAL SALES INTELLIGENCE & 7-TIER GIS

7-Tier Geographic Information System (GIS)

- **Market Mapping:** Maps sales records across seven distinct geographic layers:
Global → Country → State → District → City → Area → Pincode.

Interactive Geospatial Sales Maps

- **Regional Intelligence:** Visual maps displaying customer concentration, active sales reps, lead volume, and revenue across states and districts.

Territory Headcount Capacity Math

- **Prevents Lead Neglect:** Automatically calculates required sales reps based on territory lead volume:
Required Reps = [Current Lead Load / Capacity per Rep]
- **Overload Alerting:** Flags territories with headcount shortages before leads go cold.

Lead Management & SLA Lost Revenue Warnings

- **Lead Tracking:** Move prospects through New → Contacted → Qualified → Converted / Lost.
- **Lost Revenue Warnings:** Calculates estimated financial losses when sales leads languish past agreed response SLAs.

Customer Accounts & Lifetime Value (LTV)

- **Automatic Conversion:** Converting a qualified lead automatically provisions a linked Customer record, carrying over territory and currency while tracking lifetime purchasing history.

Commercial Opportunity Pipeline

- **Visual Deal Pacing:** Track deals through Prospecting → Qualification → Proposal → Negotiation → Closed Won / Closed Lost.
- **Mandatory Loss Reasons:** Lost deals require a verified reason (Competitor Price, Missing Feature, Budget Cut) to guide commercial strategy.

Deduplicated Realized Revenue Ledger

- **Idempotent Accounting:** Moving an opportunity to Closed Won books an immutable transaction into the financial revenue ledger.
- **Prevents Double-Booking:** Duplicate submissions are blocked by transaction locks.

Quotas, Digital Commitments & Reminders

- **Signed Target Quotas:** Reps digitally review and sign off on assigned targets on their mobile dashboard.
- **Automated Reminders:** Automated logs keep reps and managers informed of milestone pacing.

Target Compensation Simulation (What-If Preview)

- **Formula Testing:** Test incentive formulas before rollout with simulated previews at 50%, 80%, 100%, and 150% quota achievement.

Channel Partner Network

- **Partner Management:** Track authorized distributors, dealers, and value-added resellers (VARs) with territory coverage, contract terms, and partner-attributed revenue.

12. PEOPLE OPERATIONS, RECOGNITION & CULTURE

Leave Request & Review Workflow

- **Employee Self-Service:** Submit leave requests with date pickers and reason notes.
- **Manager Triage:** Reporting managers review, approve, or reject requests with review comments.

Data-Backed Recognition Badges

- **Evidence-Based Kudos:** Managers award verified achievement badges (Top Performer, Quality Champion, Skill Master, Fast Learner, On-Time Delivery, Customer Champion, Mentor) backed by documented achievements.

Private Daily Productivity To-Dos

- **Distraction-Free Checklist:** Personal daily checklist for employees.

- **Strict Privacy Rule:** Personal to-do lists are private to the individual and are never visible on manager dashboards or review screens.

Work Gamification & Streak Header

- **Daily Engagement:** Employees track their current level, XP progress, daily streaks, and completed task milestones on the Work and Dashboard pages.

13. AI WORKSPACE & ETHICAL BOUNDARIES

Floating Company Knowledge Assistant

- **Always Available:** Accessible via a floating button in the lower-right corner of every screen.
- **Policy Q&A:** Answers questions grounded in uploaded company policies and employee handbooks.
- **HR Escalation:** Automatically directs ungrounded questions to HR rather than guessing.

Employee AI Summaries

- **Draft Preparation:** Synthesizes recorded tasks, deliverables, and performance evidence into draft summaries for managers prior to reviews.
- **Strict Ethical Lock:** AI is strictly advisory. Humans make 100% of all promotion, compensation, and disciplinary decisions.

Mood Break Rejuvenation

- **Employee Wellbeing:** Built-in mood break panel offering quick mental reset activities during intense workdays.

14. EMAIL AUTOMATION (BREVO INTEGRATION)

Consented Vendor Outreach Sequences

- **Vendor Introduction Workflows:** Run multi-step email outreach sequences for approved vendor contacts with configurable follow-up delays (e.g., wait 3 days).
- **Automatic Stop Conditions:** The sequence automatically stops if the vendor replies or opts out.

Excel Vendor Contact Import

- **Column Mapping:** Upload vendor spreadsheets (.xlsx), map columns (Name, Company, Email, Source), verify consent, and preview before importing.

Real-Time Delivery Tracking

- **Delivery Telemetry:** Live dashboard tracking accepted, delivered, bounced, and replied email counts.

15. ADMINISTRATION, GOVERNANCE & SECURITY

Tamper-Evident Historical Audit Trail

- **Immutable Mutation Logs:** Permanently records actor ID, timestamp, IP address, user-agent, and full before/after state differences for sensitive operations (role changes, check-in overrides, salary revisions).

22-Section Role-Based Access Control (RBAC)

- **Role Hierarchy:** Tailored operational scopes for Super Admin, HR Admin, Department Head, Manager, Employee, and Applicant.
- **Access Control:** Governs access across 22 section permissions.

Authenticated Document Storage

- **Private Cloud Storage:** Identity proofs, contracts, and resumes are stored privately with randomized keys. Downloads require authenticated permissions and generate temporary signed URLs.
- **Fail-Closed Multi-Tenancy**
- **Data Isolation:** Organizations operate in complete isolation. Every database operation is bound to the authenticated organization with zero cross-tenant leakage.

16. SUBSCRIPTION TIERS & LICENSING

Plan Dimension	STARTER	STANDARD	PROFESSIONAL	ENTERPRISE
Max Employees	Up to 15	Up to 50	Up to 150	Unlimited
Cloud Storage	2 GB	10 GB	50 GB	Dedicated / Unlimited
Geofenced Attendance	Included	Included	Included	Included
Project Kanban & Delivery	Included	Included	Included	Included
Local Zero-Retention Voice AI	Included	Included	Included	Included
Objective Performance Reviews	Goals Only	Full Reviews	Full Reviews	Full Reviews + Snapshots
Skills Matrix & Assessments	—	Included	Included	Included
AI Policy Assistant	—	Included	Included	Included
Commercial Sales CRM & GIS	—	—	Included	Included
Vendor Email Automation	—	—	Included	Included
Custom Roles & Permissions	—	—	Included	Included
Support SLA	Standard Email	Email & Chat	Priority Assistance	Dedicated 24/7 Support

17. CONTACT & HEADQUARTERS

-  **Direct Contact:** +91 9171115206
-  **Online Platform:** www.whalexy.com | <https://employee.whalexy.com>
