

MobiusEMS: Product Brochure & Feature Guide

The Smarter Way to Manage People, Work & Growth

Mobius Bloom Venture Pvt Ltd | Deployment: <https://employee.whalexy.com>

Product Release: v2.0-PROD | Classification: Official Product Brochure

1. Why Growing Companies Need MobiusEMS

Running a growing business is hard when your everyday tools don't talk to each other. Most teams end up trapped in a daily juggling act:

- * **The Biometric Headache:** Fingerprint machines fail, create long morning lines at the door, and are completely useless for field staff or remote days.
- * **Work Chaos on Chat:** Important tasks get lost in WhatsApp chats and messy spreadsheets. Nobody knows who is working on what until a deadline is missed.
- * **Biased Year-End Appraisals:** Annual performance reviews turn into popularity contests and memory games because managers don't have records of what was actually delivered.
- * **Disconnected Sales Teams:** Sales reps log leads in expensive standalone CRMs that have no clue about employee availability, leave days, or verified accounting.
- * **Scattered Files & Resumes:** Candidate resumes sit buried in HR inboxes, training records live in separate Excel files, and there is no single source of truth.

What is MobiusEMS?

MobiusEMS is an all-in-one workforce operating system built by Whalexy. It unifies your attendance, project execution, talent recruitment, skill development, objective performance appraisals, and commercial sales into one clean, role-based platform.

Built Around Three Core Values:

1. **Real Data, Zero Office Politics:** Performance, KPI achievement, and attendance are tracked through transparent, objective calculations. AI is here to assist, never to make hiring, firing, or promotion decisions.
2. **Respectful Accountability, Not Surveillance:** No secret screen recording, no creepy keystroke loggers, and no 24/7 GPS tracking. We verify physical presence when your shift starts, and track real deliverables that get finished.
3. **Total Voice Privacy:** When you speak tasks into MobiusEMS, audio is transcribed on your local server and immediately deleted from memory. Nothing is ever sent to third-party cloud speech providers or saved on disk.

2. People & Organization Management

Complete Employee 360 Profiles

- **Single Source of Truth:** Keep every employee's personal details, government IDs (PAN, Aadhaar, Tax IDs), bank details, emergency contacts, active projects, and verified skills in one secure place.
- **Living Career Timeline:** A permanent chronological history of every promotion, title change, salary adjustment, department transfer, and award earned throughout the employee's journey.
- **Profile Health Score:** A clear visual meter showing profile completeness, encouraging team members during weekly check-ins to keep their details up to date.

Interactive Company Hierarchy & Visual Org Chart

- **Configurable Departments & Teams:** Build custom departments, sub-teams, and designations that match how your business actually runs.

- **Visual Org Chart:** Click through your company reporting hierarchy from senior executives down to individual team members. Easily spot open positions, view reporting lines, and balance team sizes.

Smooth Onboarding & First-Day Security

- **Quick HR Invites:** HR creates a profile in minutes and sends the new hire an invitation link with temporary login details.
- **Mandatory Password Reset on First Login:** Keeps company data safe by requiring new hires to set a private, secure password before accessing anything.
- **Resumable Onboarding Steps:** New employees can fill in their background, upload ID proofs, and add emergency contacts at their own pace without losing entered data.

3. Smart Geofenced Attendance & Leave Tracking

Your Phone is Your Punch Card (No Hardware Required)

- **Zero Machine Costs:** No biometric machines to buy, install, wire, or fix when they break. Employees check in using their phone or laptop browser.
- **Smart 300-Meter Office Geofence:** The system checks the employee's location when they hit Check-In, confirming they are within 300 meters of the office.
- **Anti-Spoofing Filter:** Automatically blocks fake GPS apps and mock location emulators by discarding low-accuracy signals (above 200m).

Automatic Shift Rules That Save HR Hours

- **11:30 AM Late Cutoff:** Anyone punching in after 11:30 AM is automatically marked Late, eliminating manual morning log checks.
- **4-Hour Minimum Half-Day Rule:** If an employee works less than 240 minutes (4 hours) between check-in and checkout, the day automatically logs as a Half-Day.
- **Clear Daily Statuses:** Every day is neatly tagged as Present, Late, Half-Day, On Leave, or Absent.

Self-Service Regularization & Leave Management

- **Easy Regularization:** Traveling for a client meeting or stuck in bad transit? Employees submit a quick note explaining the delay. Once their manager clicks approve, the daily record updates automatically.
- **Custom Leave Quotas:** Manage yearly allowances for Casual Leave, Sick Leave, Paid Leave, Unpaid Leave, and Work-From-Home days.
- **Overlap Protection:** Prevents duplicate or overlapping leave applications automatically.
- **Team Leave Calendar:** Managers and team members can see upcoming approved leaves at a glance, making sprint planning straightforward.

4. Project Delivery, Kanban & Daily Work

Visual 7-Stage Kanban Boards

- **Clear Stages of Work:** Tasks flow naturally through validated stages:
Not Started → In Progress → In Review → Completed
(with special handling for Blocked, Reopened, or Cancelled tasks).
- **Prevents Cheating the Workflow:** Tasks cannot jump straight from Not Started to Completed without going through work and review stages.

Instant Roadblock Alerts (Blocker Escalation)

- **Flag What's Stuck Immediately:** When a team member hits a wall, they flag the task as Blocked and select the exact reason:
- Waiting on External Dependency (client feedback, vendor API, credentials)
- Missing Assets (designs, copy, files)

- Server / Infrastructure Outage
- Unclear Requirements
- **Protects Employees from Unfair Blame:** If a project stalls because a client hasn't sent credentials, the task is marked as an external blocker so the team member's delivery score isn't penalized.

Cycle Time & Quality Rework Tracking

- **Delivery Speed:** Measures how many hours or days it takes from starting a task to getting it approved.
- **Rework Counter:** Automatically tracks whenever a task fails review and gets sent back to In Progress, helping teams spot confusing requirements early.

Company Task Tracker Grid

- **Sort & Filter Everything:** View tasks across projects by owner, priority (Low, Medium, High, Critical), status, and due date.
- **Activity Audit History:** Every status shift, priority update, and comment is logged with the user's name and exact time.

5. Local Zero-Retention Voice-to-Task AI

Speak Naturally in 11 Indian Languages + English

- **Multilingual Input:** Team members in the field or in the office can speak in English, Hindi, Bengali, Tamil, Telugu, Marathi, Gujarati, Kannada, Malayalam, Punjabi, or Urdu.

Turn Speech into Tasks in Seconds

- **Understands Intent:**
 - Say *"Need to create the quarterly presentation by tomorrow afternoon"* → Creates a new task in To-Do with tomorrow's due date.
 - Say *"Spent three hours fixing the invoice calculation bug"* → Moves the task to In Review and logs 3 hours of actual work.
- **Understands Everyday Hinglish:** Intelligently handles mixed language commands and splits compound instructions (e.g. assigning one part to Priya and another to Rahul).

100% Private — Audio Deleted Immediately

- **Zero Cloud Exposure:** Audio processing runs locally on your host server. The voice recording is processed in memory and shredded instantly. Nothing is ever sent to third-party cloud APIs or saved on disk.
- **Editable Preview Card:** Before anything is saved, an editable confirmation card pops up so the user can verify the title, assignee, and hours with a single click.

6. Talent Acquisition & AI Resume Screener

Job Requisition Library

- **Standardized Job Posts:** Maintain approved job openings with required experience, key skills, and expected responsibilities.

Visual Hiring Pipeline

- **Track Candidates from First Contact to Hire:**
Sourced → Screened → Interviewing → Offer Extended → Hired / Rejected.

Intelligent Resume Screening

- **Instant Resume Parsing:** Drop candidate resumes in PDF or Word (.docx) format directly into the screener.
- **Automated Match Scoring:** The system extracts skills, education, and years of experience, comparing them against your job requirements to give an advisory match percentage.

- **Humans Always Make the Call:** The screening score is purely a time-saving guide for interviewers. The system never rejects candidates on its own.

1-Click Hired-to-Employee Conversion

- **No Retyping Needed:** Once you mark a candidate as Hired, click "Convert to Employee". Their contact details, resume, and skills automatically populate a new Employee 360 profile, ready for onboarding.

7. Skills Matrix, Heatmaps & Assessments

Skills Inventory & 5-Star Ratings

- **Standard Skill Catalog:** Track technical, domain, and operational skills across your team with 1 to 5 star proficiency levels.
- **Two-Step Verification:** Employees rate their skills and link real evidence (GitHub repositories, portfolio links, completed certifications). Team leads review the evidence before ratings are verified.

Team Skill Heatmaps & Knowledge Gap Alerts

- **See Team Strengths at a Glance:** Color-coded heatmaps show exactly where your team excels and where skill gaps exist.
- **Single Point of Failure (SPOF) Detection:** Instantly alerts managers when only one person in the company knows a critical skill, so you can cross-train others before it becomes a bottleneck.

Timed Online Assessments

- **Custom Skills Tests:** Build assessments with timed countdowns and randomized question pools.
- **Instant Test Results:** Automated grading gives quick benchmarks for candidate screening and employee training progress.

8. Fair, Data-Backed Performance Reviews

Strategic Goals & Measurable KPIs

- **Cascading Goals:** Connect high-level company milestones down to departments and individual contributors.
- **Clear Numbers, Not Vague Feedback:** KPIs track actual numbers against target benchmarks, bounded between 0% and 200% achievement.

360-Degree Review Rubrics

- **Balanced Input:** Evaluates feedback across managers, peers, and self-reviews using structured competency rubrics (execution, teamwork, communication, and ownership).

Transparent Mathematical Scoring

- **Clear Formula:** Your team's performance rating is calculated objectively:
$$\text{Overall Rating} = (\text{Goal Achievement} \times \text{Weight}) + (\text{KPI Results} \times \text{Weight}) + (\text{360 Peer Reviews} \times \text{Weight})$$
- **Objective Performance Tiers:**
 - 90%+ : **Exceptional Performer**
 - 75% – 89.9% : **Strong Performer**
 - 60% – 74.9% : **Consistent Performer**
 - Below 60% : **Developing / Support Needed**

Immutable Review Records

- **Locked for Accuracy:** Once an appraisal cycle closes, all scores, reviews, and weighting calculations are permanently locked. They cannot be edited after the fact, ensuring complete audit integrity.

9. Workload Balancing & Smart Staffing

Workload & Burnout Radar

- **Real-Time Capacity Visibility:** See every team member's active tasks, estimated hours remaining, urgent deadlines, and overdue work.
- **Status Tags:** Automatically highlights team members who are **Overloaded**, on **High Workload**, or **Balanced**, helping managers reallocate tickets before burnout happens.

Training Catalog & Skill Growth

- **Course Catalog:** Maintain a library of internal training modules and external courses.
- **Targeted Assignments:** Managers assign training directly to help employees close identified skill gaps.
- **Track Skill Growth Over Time:** See how team members have improved year-over-year with historical rating comparisons.

Smart Project Staffing Suggestions

- **Objective Team Selection:** Need to staff a new project? MobiusEMS suggests the best team members by weighing verified skill match (70%), current workload availability (15%), and past delivery performance (15%).

10. Weekly Check-Ins & Contribution Velocity

The 3-Minute Friday Check-In

- **Simple Weekly Routine:** Every Friday afternoon, employees take 3 minutes to log three simple things:
 - What they completed this week
 - What they plan to tackle next week
 - Any blockers or help needed

Measured Deliverable Velocity

- **Focus on Output, Not Seat Time:** Tracks real deliverable completion rates over rolling 30-day and 90-day periods.

Fair Peer Comparisons

- **Cohort Benchmarking:** Compares output volume, on-time reliability, and rework frequency across peers in similar roles.

The Missing Information Guardrail

- **Fairness First:** If an employee misses a weekly check-in because they were out sick or on leave, the system flags an "Information Gap" instead of unfairly lowering their performance score.

11. Commercial Sales CRM & 7-Tier GIS

7-Tier Geographic Territory Mapping

- **From Country to Pincode:** Map sales leads, customers, and field reps across seven levels:
Global → Country → State → District → City → Area → Pincode.

Interactive Regional Sales Maps

- **Visual Territory Coverage:** Explore interactive maps showing customer density, active sales reps, lead volumes, and revenue numbers across different states and districts.

Territory Capacity Planning

- **Never Let Leads Go Cold:** The system compares incoming lead volume with your rep capacity:
Required Sales Reps = [Current Lead Volume / Capacity per Rep]
- **Understaffing Alerts:** Flags territories where reps have too many leads to handle, so you can hire or reassign staff before conversion drops.

Lead Management & SLA Lost Revenue Alerts

- **Clear Lead Pipeline:** Guide prospects through New → Contacted → Qualified → Converted / Lost.
- **SLA Revenue Alerts:** Calculates estimated revenue at risk when sales leads sit untouched past agreed response times.

Customer Accounts & Lifetime Value (LTV)

- **Automatic Customer Creation:** Converting a qualified lead automatically creates a linked Customer account, carrying over territory, currency, and lifetime sales history.

Opportunity Pipeline & Win/Loss Tracking

- **Deal Pacing:** Track deals through Prospecting → Qualification → Proposal → Negotiation → Closed Won / Closed Lost.
- **Mandatory Loss Reasons:** When a deal is marked lost, reps select why (pricing, missing feature, competitor, budget cut) to give leadership clear market feedback.

Deduplicated Won Revenue Ledger

- **Accurate Accounting:** Moving a deal to Closed Won automatically logs an entry into the realized revenue ledger, with built-in locks to prevent accidental duplicate entries.

Quotas & Compensation Simulation

- **Digital Target Sign-Off:** Sales reps review and digitally sign off on their monthly or quarterly targets right on their dashboard.
- **Incentive Simulation:** Model commission payouts at 50%, 80%, 100%, and 150% quota achievement before rolling them out.

Channel Partner Management

- **Partner Network:** Manage distributors, dealers, and value-added resellers (VARs) with territory assignments, contract terms, and partner-generated revenue tracking.

12. Everyday Workplace Experience & Culture

Self-Service Leave Approvals

- **Quick Leave Requests:** Employees pick dates, select leave type, and add a brief note. Managers receive instant notifications and can approve or decline in one click.

Data-Backed Recognition Badges

- **Meaningful Recognition:** Managers award verified badges (Top Performer, Quality Champion, Skill Master, Fast Learner, On-Time Delivery, Customer Champion, Mentor) backed by specific project milestones.

Private Daily To-Do Lists

- **Personal Daily Focus:** Built-in daily checklist for employees to organize their morning priorities.
- **100% Private:** An employee's personal to-do list is strictly private. It is never visible on manager dashboards or in performance reviews.

Work Streaks & Engagement Header

- **Gamified Momentum:** Employees see their daily streak, completed task count, and progress bar at the top of their workspace, celebrating consistent daily effort.

13. AI Workspace & Ethical Boundaries

Floating Company Handbook Assistant

- **Instant Policy Answers:** An unobtrusive AI helper button sits in the bottom corner of the screen to answer questions about company policies, leave guidelines, and office timings.
- **Never Guesses:** If an employee asks a question not covered in uploaded company policies, the assistant automatically routes the question to HR.

Pre-Review AI Summaries

- **Saves Managers Hours:** Compiles an employee's completed deliverables, logged hours, and peer feedback into a clean draft summary before review meetings.

Strict Ethical Guardrail

- **Humans Always Decide:** AI is strictly an advisory assistant. It is blocked by design from making hiring, firing, salary, or promotion decisions.

Mood Break Wellbeing Panel

- **Mid-Day Mental Reset:** A built-in wellbeing panel offering quick breathing exercises and mental break activities during busy workdays.

14. Email Automation (Brevo Integration)

Vendor Introduction Sequences

- **Automated Partner Outreach:** Set up multi-step introduction emails for approved vendor contacts with custom waiting periods between messages.
- **Automatic Stop on Reply:** The email sequence automatically halts the moment a vendor responds or unsubscribes.

Excel Vendor Contact Import

- **Simple Spreadsheet Upload:** Upload your vendor list in Excel (.xlsx), map columns (Name, Email, Company, Source), verify consent, and preview before importing.

Live Delivery Telemetry

- **Real-Time Stats:** Live dashboard tracking email sent counts, delivery rates, open rates, and replies.

15. Security, Governance & Audit Trails

Permanent Audit Trail

- **Track Sensitive Changes:** Every role modification, check-in override, salary update, and system setting change is permanently logged with the user ID, timestamp, IP address, and before-and-after values.

22-Section Role-Based Access Control

- **Right Access for Every Role:** Granular permission settings tailored for Super Admins, HR Admins, Department Heads, Team Managers, Employees, and Job Applicants.
- ## Secure Private Document Storage
- **Protected Files:** Identity documents, employment contracts, and candidate resumes are stored securely with encrypted keys. Downloads require authenticated permissions and generate temporary, expiring links.
- ## Complete Organization Data Isolation
- **Zero Data Leakage:** Every company on MobiusEMS runs in complete digital isolation. Your data is never mixed with or accessible by any other organization.

16. Plan Options & Pricing Tiers

Feature Comparison	STARTER	STANDARD	PROFESSIONAL	ENTERPRISE
Team Size	Up to 15	Up to 50	Up to 150	Unlimited
Document Storage	2 GB	10 GB	50 GB	Unlimited
Geofenced Attendance	Included	Included	Included	Included
Visual Kanban & Projects	Included	Included	Included	Included
Local Voice-to-Task AI	Included	Included	Included	Included
Performance Reviews	Basic Goals	Full Reviews	Full Reviews	Full Reviews + History
Skills Matrix & Tests	—	Included	Included	Included
Company Policy AI	—	Included	Included	Included
Sales CRM & 7-Tier GIS	—	—	Included	Included
Vendor Email Sequences	—	—	Included	Included
Custom Access Roles	—	—	Included	Included
Support SLA	Standard Email	Email & Chat	Priority Assistance	Dedicated 24/7 Team

17. The Old Way vs The MobiusEMS Way

Workplace Function	The Traditional Way	The MobiusEMS Way
Attendance Punching	Expensive fingerprint scanners, long morning lines, and broken devices.	Mobile browser check-in with a 300-meter GPS fence. Zero hardware.
Creating Daily Tasks	Typing forms on a laptop or sending unstructured messages on WhatsApp.	Speak naturally in 11 Indian languages. Instant task setup with zero audio saved.
Managing Work	Scattered Excel sheets, missed deadlines, and unflagged roadblocks.	7-stage visual Kanban board with instant blocker alerts that protect team scores.
Performance Reviews	Once-a-year popularity contests based on memory and recency bias.	Continuous reviews combining goals, KPIs, and peer feedback in transparent math.
Hiring & Screening	Sifting through hundreds of resumes by hand in messy email inboxes.	Visual applicant pipeline with AI resume screening and 1-click employee onboarding.
Sales Operations	Costly standalone CRMs disconnected from team leave and company ledgers.	Integrated 7-tier GIS, lead SLA warnings, rep capacity math, and won revenue ledgers.
